

ScanAfia XHS Nursing Bed

Main features:

1. High Safe Working Load (SWL) of 260 kg
2. Low minimum height (from 32 cm) improves patient safety and self-reliance
3. Back section sliding mechanism prevents patient slipping downwards and improves comfort

The ScanAfia XHS nursing bed is the number one quality choice for the healthcare professional. The newest nursing bed in the product range, it has been designed to suit a variety of care environments, where design and appearance are appreciated as much as reliability and ease of use. Although it is able to take up to 260 kg weight (SWL), the ScanAfia XHS is lightweight and easy to manoeuvre, thanks to the 125 mm castors fitted as standard.

The bed's exceptional height adjustment range makes it safer and more comfortable to use for recuperating patients and makes work easier for carers. Our many years' experience in designing and manufacturing hospital and nursing beds ensures that the ScanAfia XHS is made for long-term use with minimal maintenance. The base of the bed is made of hygienic ABS-plastic with ventilation holes. This base structure allows the foam mattress to retain its characteristics better than it would with a traditional mesh base. The base can easily be removed for disinfecting.

The Range:

- ScanAfia XHS 280/290: 2-part bed section (205 X 80/90 cm), with electrical height and back section adjustment
- ScanAfia XHS 480/490: 4-part bed section (205 X 80/90 cm), with electrical height, back, calf and leg section adjustment
