

4040XL Heavy duty examination table

An innovative general examination table for demanding use

Product pictured with optional accessories.

Main features:

1. The patient surface width (up to 100cm) together with a thick upholstery ensure a pleasant experience
2. A very high safe working load (SWL) of 300kg and new features improve patient safety
3. Height adjustment range of 42 – 97 cm helps patients and makes working more ergonomic

The new 4040XL is an excellent choice for all healthcare facilities that need to treat also overweight and obese patients. Its patented construction and extremely low minimum height ensure that even patients with wheelchair or obese patients are able to get up onto the table with ease. High maximum height improves ergonomics of the care providers. The patient surface width together with a thick upholstery (foam 6 cm) provide very pleasant experience for the patient. The default patient surface width is 90 cm (80 cm and 100 cm as options).

In all Lojer products patient safety is of utmost importance. The 4040XL has a new safety feature: the table top rises automatically if there's something caught between the mechanism. The very high safe working load (SWL) of 300 kg makes it safe to treat also bariatric patients in all positions and heights.

The 4040XL examination table has a new digital control unit, which notifies user of maintenance need. It also allows locking up the table with the hand control. The table features a paper roll holder and cutter as standard, as well as an adapter for fitting an IV-stand (6 possible fitting positions). A two-piece hands-free height adjustment bar is available as an option, enabling the table height and back section to be adjusted ergonomically and hygienically from both sides of the table by foot. Also electric Trendelenburg and anti-Trendelenburg are available as options.
